About Me

Passionate about learning new and challenging things and implementing them in new projects. Seeking for different opportunities which will enhance my **JAVA and DATABASE** (SQL, MYSQL, PL/SQL, Oracle) knowledge to peak. Ability to analyse problems and provide technical solutions. Looking for an entry-level job to start career as full-stack developer and database administrator Capable of building robust applications and designing innovative web pages.

Experience (College Projects)

- Build **movies' reviews app**, with different **login entitlements** and **roles** and different databases along with **spring security** with **Spring Boot** on **eclipse IDE**
- Built a **CRUD Project** with the use of **Spring Boot** framework which helps **online shopping** at grocery store which **contains database** of different categories, then add the selected items to **cart** and at last **make a total**
- Developed a **payroll system** for a company using Java FX which reads and save the data in text files using **VS Code**
- With Java FX developed an **image gallery, contact book, bills of restaurant**
- Vehicles DBMS with the use of **WPF and C#** with CRUD operations.
- **Database Management** project using **Oracle** which does many operations using different queries on database provided by college
- **Angular Projects** with **JSON**
 - ✓ Menu of diner with 3 meals time (corresponding menu (**breakfast, lunch, dinner**) will be shown according to **current time**)
 - ✓ **Multiple page** website forms with the use of **local storage**
 - ✓ **Angular Apps** which extract the data from JSON including components and angular material (mat-tabs, mat-buttons, icons)
